

## E71 X6 3.0d Hartge Complete Conversion

There is little doubt that whilst BMW have endowed the car with superb dynamics, there remain significant margins where performance can be improved. We have co-ordinated all of the necessary equipment and expertise to transform the braking, handling, traction and ride quality, so that the driver is able to fully communicate with the chassis, and truly elevating the dynamics to provide the real ultimate driving experience.

All technical work is undertaken at Birds facility in Iver, near Heathrow, with new engine management maps individually programmed and transmitted from the factory. All conversions are properly guaranteed for both performance and longevity. Only the best will do, and only available from Birds, The UK's Premier Tuning Company.

### Hartge Engine Management Modifications

Today's high performance engines – many of which have already been almost fully developed at the factory – call for tuners who can do more than just tweak them digitally. Indeed, chip tuning – a magic word in this day and age – is more of a taboo subject at Hartge.

Anyone who doesn't know what engines go through under the hardest driving conditions or in racing simply give the 'power screw' another twist. At Hartge, all engine components as well as the drive train, chassis, bodywork and brakes, are tested on the bench and on the road before being approved for sale.

And this is backed by over 36 years experience in the field of high performance engine building.

The Hartge Motronic Modification is guaranteed for a period matching the BMW Manufacturer guarantee, and does not invalidate the BMW Manufacturers warranty. For vehicles outside of Manufacturers warranty, the guarantee period is one year. In all cases, a maximum of 60,000 miles applies.

### Kevin Bird Garages Limited

Tel 01753 657 444, Fax 01753 655 963, Web [www.BirdsAuto.com](http://www.BirdsAuto.com)

The complete conversion consists of the following items. We will be pleased to revise specifications and pricing to your individual requirements.

|                |  |
|----------------|--|
| Engine         | Diesel Motronic Modification 275hp                       |
| Suspension     | Sport Suspension Springs with Self Leveling (30mm lower) |
| Wheels & Tyres | 22" Classic 2 Wheel & Tyre Set                           |
| Interior       | Carbon steering wheel cover, Alloy Pedal Set             |
| Exterior       | Carbon mirror covers, Roundels front and rear            |

**Sport Suspension Springs** - The springs are stiffer than standard, yielding benefits in both roll and cornering poise, yet do not compromising ride quality. They lower the X6 by 30mm, giving it an impressive edge in looks but also catering for dynamic limits on uneven roads.

**22" Hartge Classic 2 Wheels and Tyres** – Continental tyres have been specially selected for their quiet running, impeccable wet road traction, and impressive speed rating. All of the benefits of the Hartge Classic, with the added advantage of radial spokes which integrate with the outer rim, making the wheel appear larger than their nominal dimensions. Ride quality is retained for everyday use.

**Carbon Steering Wheels Cover** – Only applicable to cars with BMW 3-spoke sports airbag and multi function steering wheel.

**Alloy Pedal Set** - Interior detailing (alloy foot rest also available) completes the look of any complete conversion giving your BMW an upgraded feeling in the cabin.

**Carbon Fibre Mirror Covers** – A pair of Hartge carbon fibre mirror covers is now available for the new X6, giving it an exclusive edge and dashing looks.

**Hartge roundels** – To finish off the conversion, a Hartge badge on the front and rear in place of the BMW badges completes the transformation. Your brand new Hartge X6...
